

MOOD

Acoustic textile wall panels

Mood is a photo fabric that is stretched over an aluminum frame in which sound-absorbing tiles are fitted. Optional subjects with high image quality, easy to assemble and transport regardless of size.

A superb and creative solution for improved sound environment. You have the opportunity to use your own images and motifs or use consultation by interior designer and acoustic expert from Okko Design.

Mood acoustic screen is highly soundabsorbing (Class A) and can be customized with any image or size.

Material: Alu Tex textile, an acoustic fabric stretched over an aluminium frame filled with 50 mm acoustic elements.
