

SQUARE

Acoustic wall panel

Design by: Okko and MMJ creative studio

Square is an acoustic wall panel made from hemp fiber, an ecological natural material with fantastic acoustic and aesthetic properties. The contrast between the straight lines of the pattern and the soft surface created by the hemp's natural structure creates an interesting visual aesthetic expression while improving the acoustics and creating a healthy and pleasant sound environment in the room.

Square can be manufactured in different sizes depending on the size of the space and the need for sound attenuation in the room.

Material: Hemp fiber, with or without a wooden frame. Also available in Alu Tex textile, an acoustic fabric stretched over an aluminium frame filled with 50 mm acoustic elements.

Color: Available in all NCS colors

Size: Customized sizes

Sustainable and ecological

Fireproof class B

Sound absorption class A
